- 3/4 GALLON MIXES 3:1, YIELDING 1 SPRAYABLE GALLON
- 10 COLORS AVAILABLE IN 3/4 QUARTS

Kirker's ULTRA-GLO Single-Stage Urethane Topcoats offer a premium-quality finish at minimal cost. This high-gloss, ultra-durable coating is designed for a wide variety of applications including automotive restoration, custom paint and fleet refinishing. Kirker's most advanced single-stage topcoat system provides a high degree of UV protection to keep vehicles looking glossy and deep in color for years. ULTRA-GLO provides serious resistance to dangerous chemicals, everyday weathering and aggravating stone chips.

This acrylic urethane topcoat can be used in single-stage applications or in combination with a clearcoat for added durability. Using the ULTRA-LOCK Metallic Control Additive/Basecoat Stabilizer (UA-2400) helps improve sprayability and ease of use, thanks to anti-mottle technology that stabilizes metallic and pearl particles, locking them in place for an even, streak-free finish.
