

TIRE & VINYL SHINE™

Dressing & Protectant

FEATURES

- VOC compliant. Water-based, non-toxic formula.
- Restores luster and shine to inside and outside vehicle surfaces made of vinyl, leather, rubber and plastic.
- Forms a dry, non-greasy, anti-static, protective shield with UV protection from the sun's harmful rays.
- Will not transfer to clothing from seats or any treated surfaces.
- High or low gloss dependent on application.
- Easy to remove from surfaces prior to painting.

DESCRIPTION

WIZARDS® TIRE & VINYL SHINE™ is a multiple use dressing and protectant -- a one step surface treatment that beautifies vinyl, leather, rubber, and plastic surfaces. TIRE & VINYL SHINE™ is an excellent product for use inside the vehicle on steering wheels, seats, dashboards, doors and moldings. Outside the vehicle use TIRE & VINYL SHINE™ to enhance tires, bumpers, moldings and vinyl tops.

BENEFITS

TIRE & VINYL SHINE™ is a water-based conditioner that, when dry, forms a protective shield to guard against dullness, drying and cracking.

As an added bonus, TIRE & VINYL SHINE™ dries fast to a nice gloss finish. There is never a greasy residue left behind to attract dust and rub off on clothing.

HOW TO USE

Clean surface first. Shake product well and apply to a cool, dry surface. Spray directly on to surface or cloth/foam applicator pad and apply evenly. Buff with a clean cloth, if desired. Gloss levels will be determined by the amount of product applied (more product, more gloss); the dry time (drying completely before adding a second coat increases gloss); and the extent of buffing (more buffing means more gloss).

HINT: TIRE & VINYL SHINE™ can be easily removed from vehicles prior to painting by wiping down with a common prep pre-cleaner, such as Prep Sol or Final Wash (grease, wax and tar removers) followed by #11077 WIZARDS® WASH. Always avoid spraying TIRE & VINYL SHINE™ near paint stations while painting.
