

BUG RELEASE™

Bug Remover and Presoak

FEATURES

- VOC compliant.
- Quickly softens and neutralizes acidic bug proteins so they can be easily washed away.
- Works on all painted surfaces: cars, trucks, motorcycles, campers, boats, planes.
- Safe to use on paint, chrome, glass and most plastic surfaces.
- Use as a presoak before washing or as a quick spot remover.

DESCRIPTION

WIZARDS® BUG RELEASE™ is a powerful and effective cleaner specifically formulated to soften and neutralize the acidic proteins found in bugs. This neutralization process safely releases bug residue without attacking or damaging surfaces, including paint, chrome, glass and plastic.

BUG RELEASE™ can also be used as an effective spot cleaner of bug residue on mirrors, grills and trim. Quickly removing bugs prevents spotting and staining of the surface.

BUG RELEASE™ is non-toxic, biodegradable and comes ready-to-use in a convenient spray bottle.

BENEFITS

BUG RELEASE™ is very effective as a presoak. When BUG RELEASE™ is sprayed on bug-coated areas before washing the vehicle, the residue becomes very soft and easily washes away.

HOW TO USE

Shake lightly. Spray on to a cool surface. For light bug residue, allow to soak for 60 seconds then wipe clean. For heavy bug residue, flood area and allow to soak for 60 seconds. Wash off with a wet cloth or sponge. Rinse with water and dry.

BUG RELEASE™ is not recommended as a wax remover or pre-cleaner for paint prep.

Do not allow BUG RELEASE™ to dry or evaporate on the vehicle surface. If drying occurs, reapply. Always wash hands thoroughly after use.

Bug residue that is completely dried and baked on or waxed over may require additional applications and/or extra scrubbing to remove.

HINT: to make future bug removal easier, always recoat the area with #11033 SHINE MASTER™ polish, #11500 SUPREME SEAL™ Paint Sealant or #01214 Mist-N-Shine® Detailer.
